

Burnt Bucks Lightpaper

The Memecoin So Hot, It's Literally Burning Up!

Ever looked at your money and thought, "This would look better if it was on fire?" Well, that's kind of what we thought when we created Burnt Bucks (\$BURNT) - the first algorithmic, community-driven memecoin that's so lit, it's constantly burning itself out of existence. Think of it like a campfire, but instead of wood, we're throwing in coins. And, instead of warmth, you get... Well, crypto!

The Burnt Bucks Mechanism:

The Burn Cycle

Every time someone makes a transaction with \$BURNT, our AI treasury management bot, affectionately named "**Burnie**", gets a little hungry. **3% of every transaction is sent to Burnie**, who gleefully throws it into the digital flames. It's not that Burnie is a pyromaniac, he's just really committed to his job.

Community-Driven Flames

The community fuels Burnie's insatiable appetite. The more transactions, the more Burnie gets to feast. It's a win-win. Burnie gets his fiery snacks, and the supply of \$BURNT keeps dwindling, making each coin potentially more valuable!

Advantages of Burnt Bucks:

Scarcity

The continuous burning ensures a decreasing supply over time, potentially increasing the value of the remaining coins. Think of it as the crypto version of 'limited edition'.

Fun and Memes

Our community is as fiery as Burnie's appetite. Expect memes, jokes, and a whole lot of roasted marshmallows. Join us, and be part of the hottest crypto party in town!

AI-Powered

Burnie isn't just any bot; **he's an AI bot**. While he's busy burning coins, he's also constantly learning and adapting to ensure the best burning strategy. He's like the Terminator, but for coins.

How to Get Burnt

Ready to jump into the flames? Here's how:

1. Buy **\$BURNT** from your uniswap exchange.
2. Make transactions, and watch Burnie do his thing.
3. Join our community, share memes, and watch the world burn (in a good way).

Burnt Bucks isn't just another memecoin; it's a fiery revolution. With Burnie at the helm, we're changing the crypto game one burn at a time. So, if you like your crypto with a side of fun and a hint of roast, \$BURNT is the coin for you.
